Hi,

I'm Dennis and I'm looking for an internship where I can combine my love for IT, design and all things creative. Right now, I'm studying Experience Design at Changemaker Educations in Stockholm. I'm also freelancing and taking on side projects because I thrive on learning new things and pushing myself to grow.

Recently, I had the opportunity to work on some exciting projects. In Spring 2024, I was the UX/UI Lead and Business Strategist for Parking Time, where I immersed myself in both the design and strategic aspects of the project. After that, I worked with Red Milk LLC as Project Manager, Researcher and Business Strategy Analyst—a key role that really sharpened my leadership skills. Right now, I'm collaborating with another experienced designer and I'll be using my design knowledge to develop the website for Pro Event Staffing. Coding and designing the entire platform from scratch to learn more about php and javascript. Each project has taught me the art of balancing creativity with problem-solving and I love the challenge of bringing ideas from concept to reality.

In addition to my work in IT and design, I bring over a decade of experience in customer service. During my time at ICA Kvantum Värtan (2011–2023), I was responsible for leading customer service operations, managing teams, and improving store processes during different periods. This experience taught me how to remain calm under pressure, handle responsibility and ensure customer satisfaction—skills that I apply to every project I take on today.

I'm the kind of person who, once I'm interested in something, dives in headfirst and learns as much as I can, as quickly as I can. Whether it's mastering a new design tool or writing cleaner code, I'm always pushing myself to improve. I'm excited about the chance to bring that drive and passion to your team.

Thank you for considering my application. I'd love to chat more over a Swedish fika about how I can contribute to your team and help bring ideas to life.

Kind regards,
Dennis Lantz

Trivia

Before IT took over my life, I spent over 15 years traveling to more than 20 countries as a dancer. I had the honor of judging battles like Lock City in Singapore (2016), Allstyle Battle in Lithuania (2012), and Allstyle Battle in Austria (2017). Dance will always be a part of who I am, especially since I had amazing mentors like Don Campbell, the creator of locking. It has been an honour to be a big part of Campbells family (since 2014). But these days, my passion for IT and design keeps me up at night (in the best way possible), as I'm constantly learning and improving my skills in coding, UX, and UI.
